a new dimension in mass record handling

Super
ELEVATOR FILE "63"

DIEBOLD
INCORPORATED
CANTON   OHIO

CONSOLIDATED RECORD FILING WITH PUSH-BUTTON CONVENIENCE AND SPEED

For the greatest concentration of active records in the smallest space—yet providing fast and easy accessibility—nothing compares with the Diebold Super "63" Elevator File. A simple touch of the button brings the desired records to the operator's fingertips with amazing speed . . . requiring only 3 seconds average time.

DIEBOLD

VISIBILITY UNLIMITED

The new, low silhouette of the Diebold Super "63" affords "Super-Vision" —both from operator and office viewpoint.

Records are spread before operator in well-lighted, ideal viewing position for maximum accuracy and convenience.

Because the low height does not block the view, better office supervision is obtained.

ELECTRICITY DOES THE HEAVY WORK!

No stooping, stretching or pulling to find a record. A touch of a button and the desired record is within easy reach . . . *in an average of only 3 seconds.* No special wiring is needed.

SLOPE-FRONT CONTOUR FOR OPERATING CONVENIENCE AND COMFORT!

Plenty of leg and knee space for operator . . . allows for most comfortable and efficient working position.

Super ELEVATOR FILE "63"

THE ACCENT'S ON CAPACITY!

The Diebold Super "63" Elevator File is as compact as it is convenient. Requires less than 23 square feet of floor space to house over 200,000 5" x 3" records.
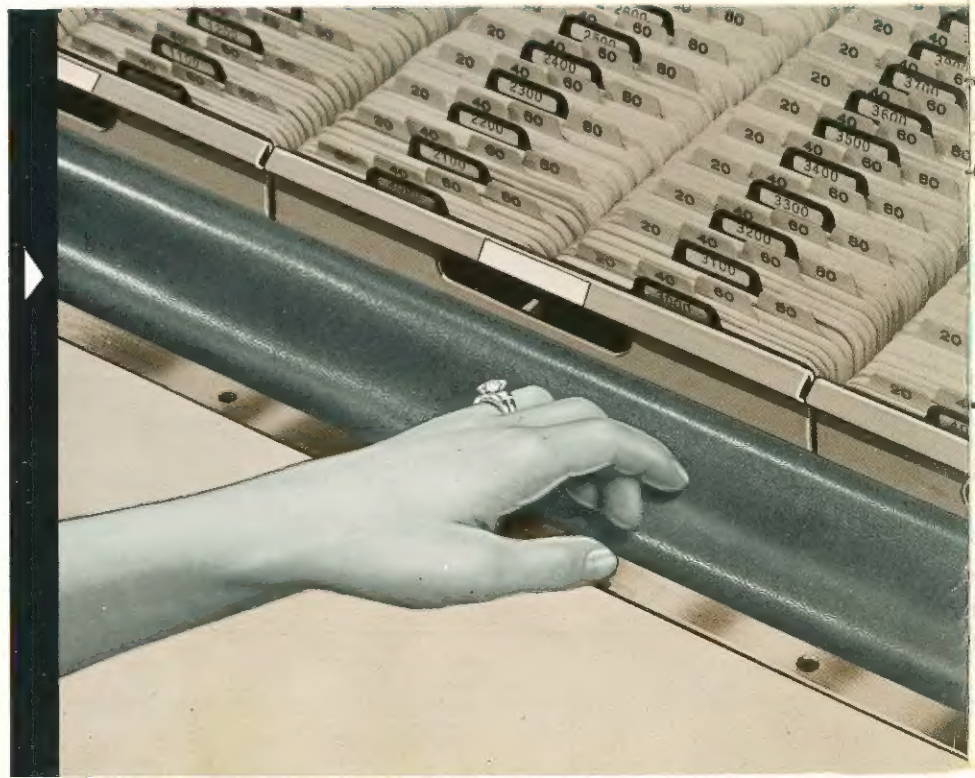

PUSH BUTTON SELECTOR

Finding the right record is as easy as pushing a button with the Diebold Super "63." When depressed, latch-type button automatically holds contact until desired record pan reaches the correct working position.

BUILT-IN SAFETY!

Should operator accidentally activate machine while checking records, the slightest pressure on the full-width "Guard Panel" cuts off all power, stopping the file instantly. File can also be stopped in motion by depressing red "stop" button. When front access panels are removed, contact switches guarantee to stop the motor.
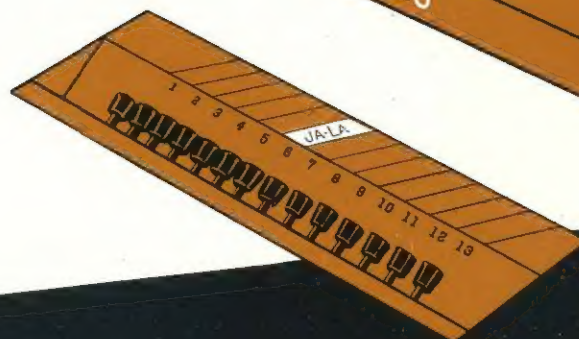

WHISPERS WHILE IT WORKS

The Diebold Super "63" is as quiet as it is quick. Only a demonstration will prove how really quiet the Super "63" operates.

MULTIPLE GUIDING MAKES RECORD FINDING FASTER

Individual push buttons are indexed to identify the record breakdown in each pan. Large labels on trays further identify the record grouping . . . and are scientifically angled to provide "non glare" direct visibility from seated working position.
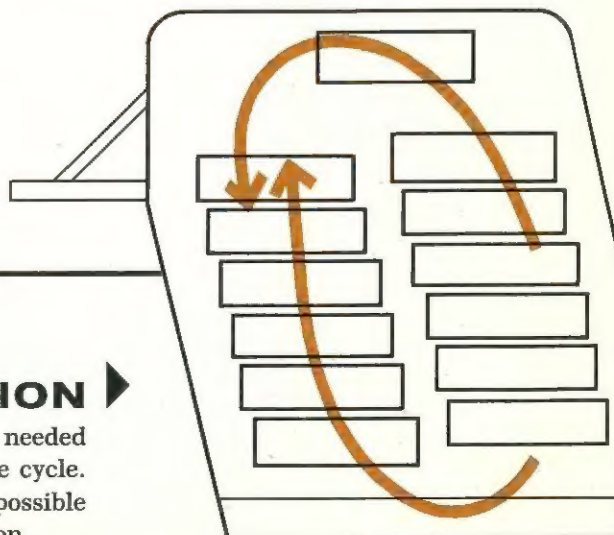

AUTOMATIC RECORD SELECTION AT THE TOUCH OF A BUTTON!

FAST SPREAD FINDING

All records in each individual pan are spread before the operator where the guides can be spotted at a glance . . . taking the operator right to the desired record.

"PRIORITY PILOT" CONTROL DICTATES DIRECTION OF ROTATION ▶

The Diebold Super "63" Elevator File makes *direct delivery* of the needed records. There's no waiting for the machine to go through a complete cycle. Diebold's "Priority Pilot" brings records by the shortest and fastest possible route, stopping automatically at the most convenient working position.
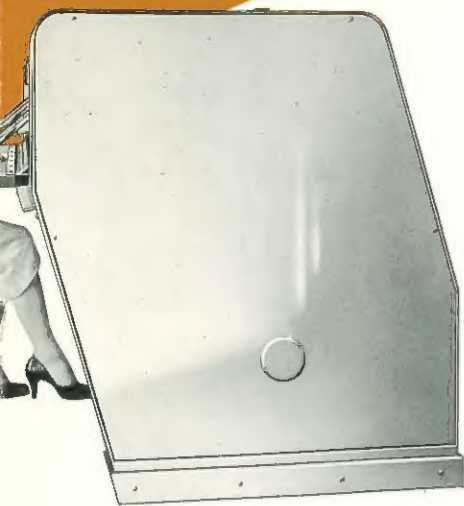

IDEAL WORKING AREA

Notice the position at which the Diebold Super "63" places the required records. *The operator works in a comfortably seated position, with the records at her fingertips*—the perfect position for finding records quickly and accurately.

A convenient, full width shelf provides plenty of working space at desk top level.

. . . no built-up platforms or special chairs

MAXIMUM KNEE SPACE FOR OPERATOR'S COMFORT

ALL RECORDS IN FILE EASILY ACCESSIBLE

. . . no stretch, no strain!

RECORDS SPREAD BEFORE OPERATOR IN WELL-LIGHTED POSITION

Fully recessed hood admits maximum amount of light on exposed records and working area. Provides complete visibility . . . eliminates eye-strain.

ALL RECORDS DELIVERED TO DESK TOP LEVEL

. . . no squat, no stoop!

MULTIPLE TRAYS PROVIDE GREATER FLEXIBILITY

Various trays for housing records of different sizes can be used in the same file. *All trays are interchangeable.* Arrangements of trays as flexible as your needs.

FACILITATE DIVISION OF WORK

Multiple short trays expedite record breakdown and grouping . . . facilitate division of work at peak intervals and for periodic checking.
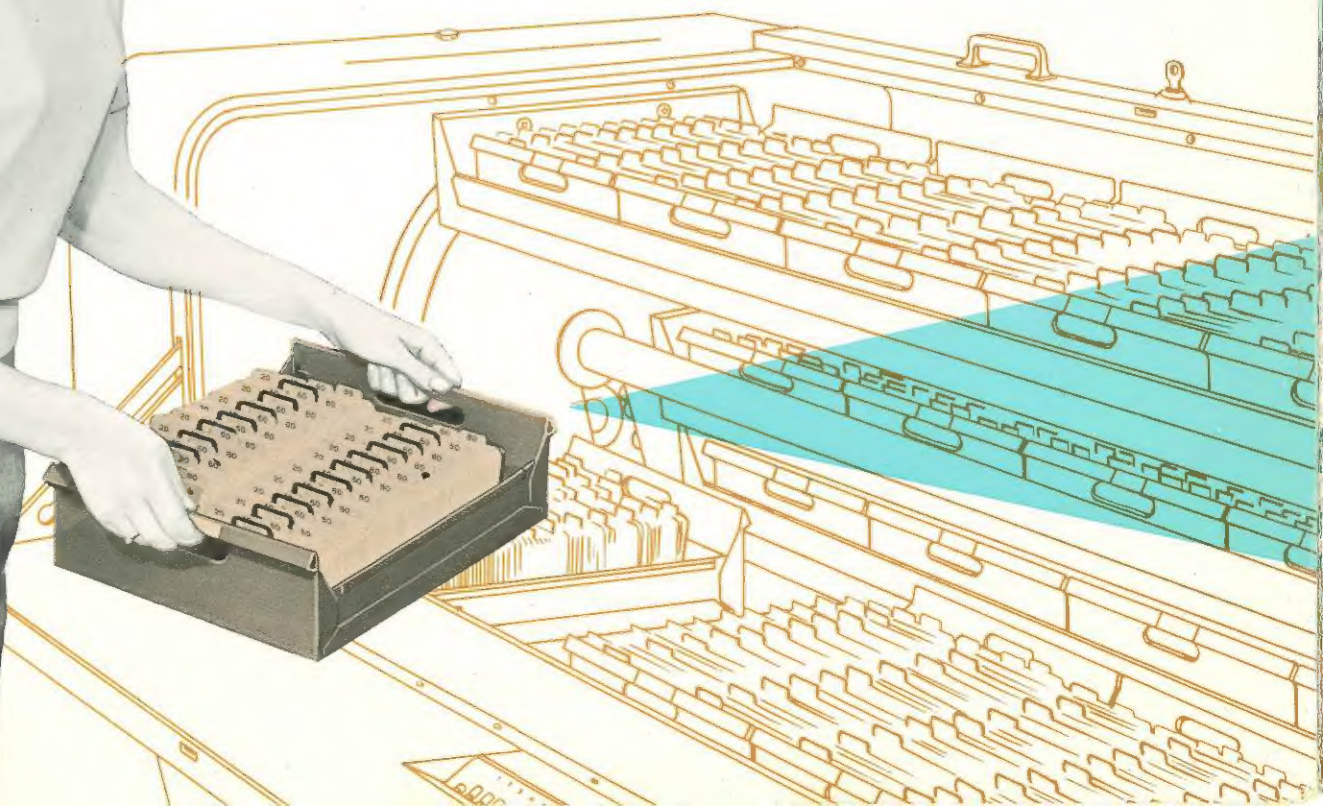

SHORT TRAY REACH

Trays in the Diebold Super "63" are 13" deep, so every record from front to back is immediately accessible without stretching. Short tray makes guides and records more visible.
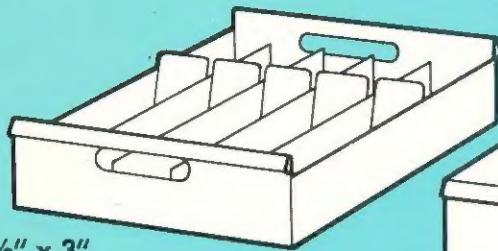

LIFT OUT TRAY UNITS

Light-weight trays can be easily removed from the file. No gadgets needed or adjustments to make.
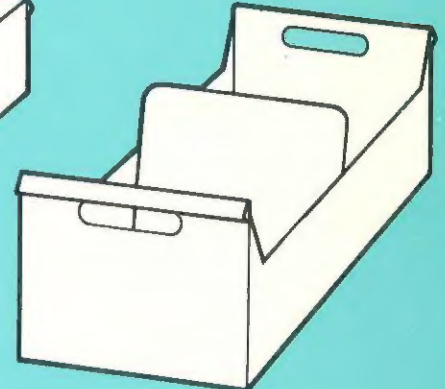

VARIETY OF RECORD SIZES

The Diebold Super "63" is designed to accommodate a wide range of different record sizes. This versatility of design means you can use the Super "63" to speed your record-handling by using the records best suited to your needs.
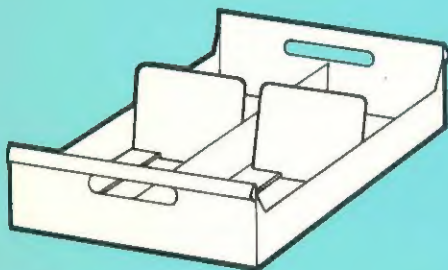

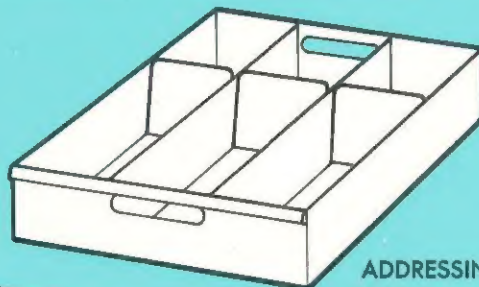

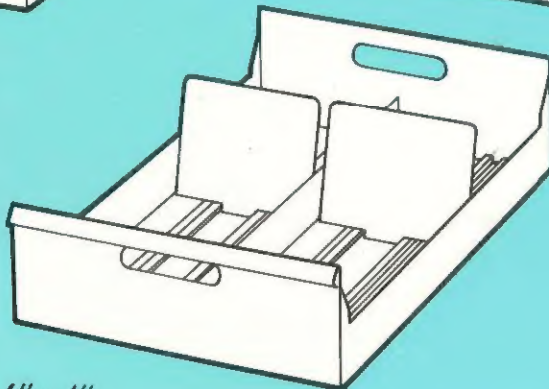

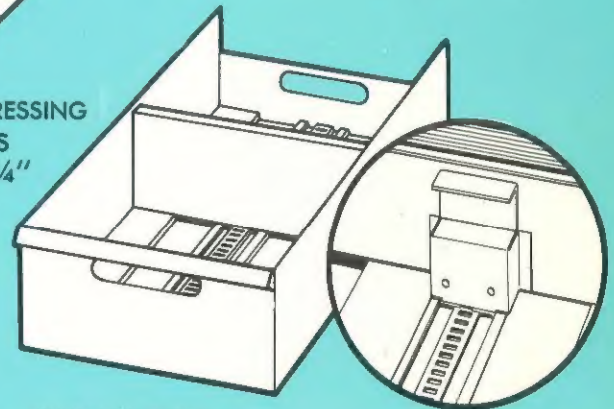

2½" x 3"

7⅜" x 3¼"
ALSO AVAILABLE WITH FLEX-BLOK FOLLOWER.

6" x 4"

AUTOMATIC "V"

Designed to open a working "V" anywhere in the tray—and to hold the place automatically until the record is returned. No place markers necessary.

ACCOMMODATES PRESENT RECORDS

You can put a Diebold Super "63" to work without incurring costly record change-over. Just use your present records . . . no need for transcription.

EXPANSION IS EASY

Unique tray and follower block construction makes expansion or contraction easy . . . takes up slack in trays not filled to capacity, yet allows freedom of movement in trays when filled.

CIRCUIT-BREAKER SWITCH

A circuit-breaker type switch controls current to file's electric motor. Signal light at left of switch is lighted to indicate power is on. In event of an overload condition, switch will snap to "Off" position instantly cutting off current to motor. Reset to "On" position when overload is corrected. No fuses or special wiring required.
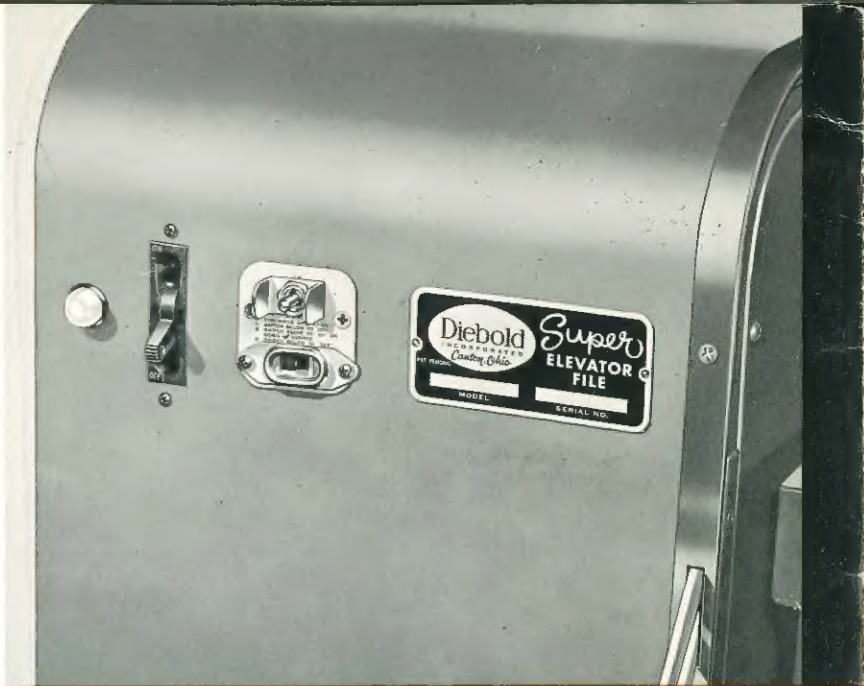

CONTINUOUS CONTROL OPERATION *for stand-up reference*

When desired, the Diebold Super "63" can be operated manually by switching file from automatic to manual control. When on manual control, file trays can be brought to working level desired and held in that position as long as needed.

HOOD WITH KEY-LOCK FOR RECORD SECURITY

Easily-positioned, key-locked hood keeps records free of dust and unauthorized access. Dual "booster" springs take the effort out of opening and closing the roller hood. Once started in either direction, this unique spring actuation rolls the hood . . . *almost by itself*.

Full width work shelf folds up when not in use.

OPERATOR'S CONVENIENCE COMPARTMENT

Key-locked, roomy compartment for operator's personal effects—handbag, etc. So convenient, she uses it for her desk.
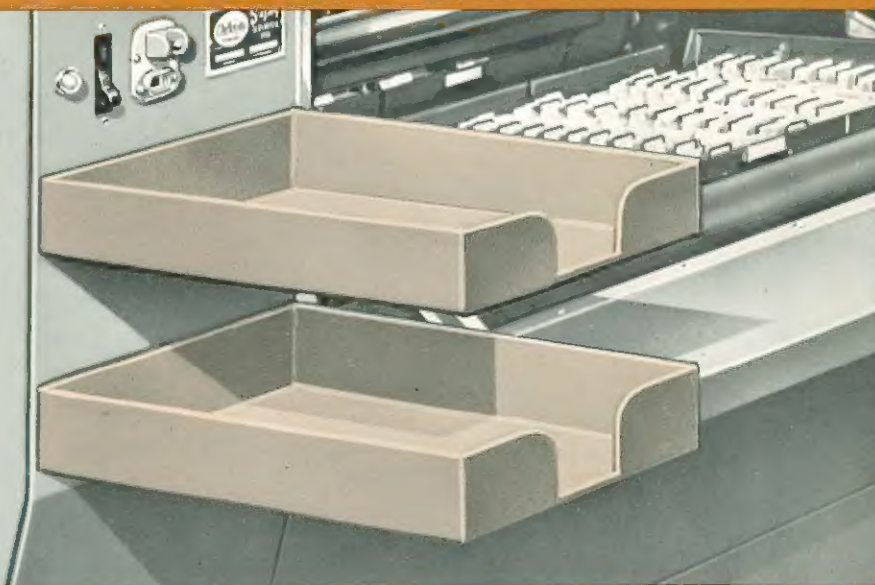

POSTURE CHAIRS

Diebold Posture Chairs are the natural companion to your Super Elevator File. Finished in contemporary black and white taurus fabric, the chairs are styled to harmonize with the design of the file. The back rest is adjustable for natural support . . . the seat adjustable to maximum height of 21½". Convenient foot-ring ideally located 5½" from floor.
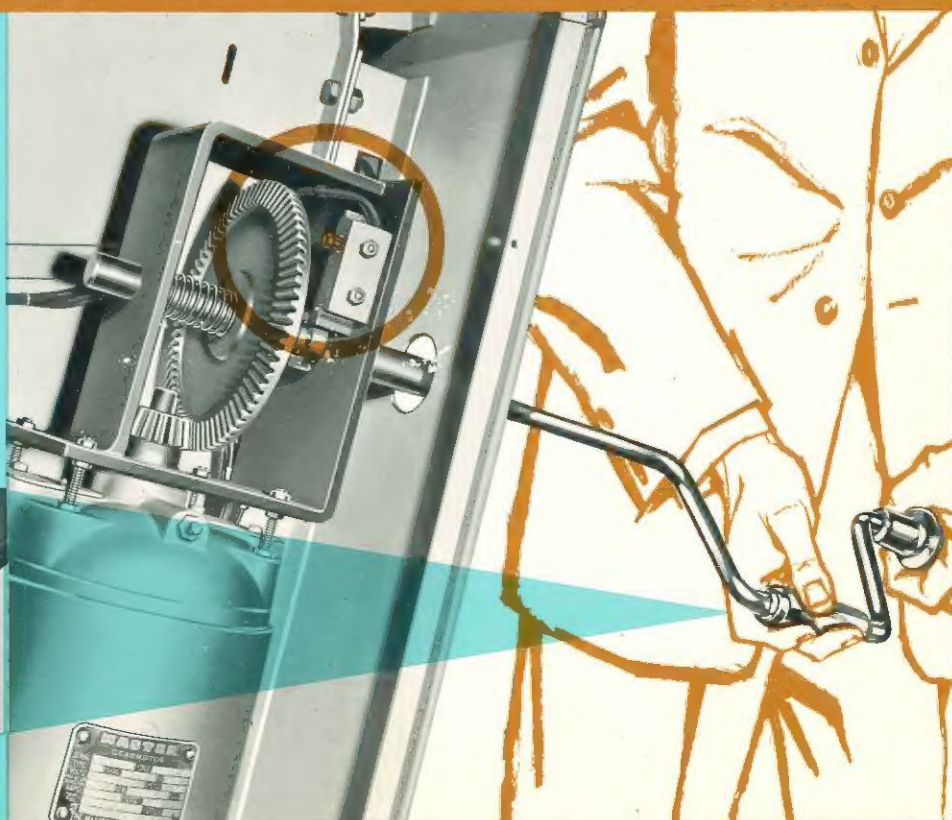

"IN AND OUT" TRAYS

Ideal for filing incoming and outgoing records. In addition, the Super "63" Elevator File can easily be equipped with telephone facilities, making contents of file available on call to any department concerned.
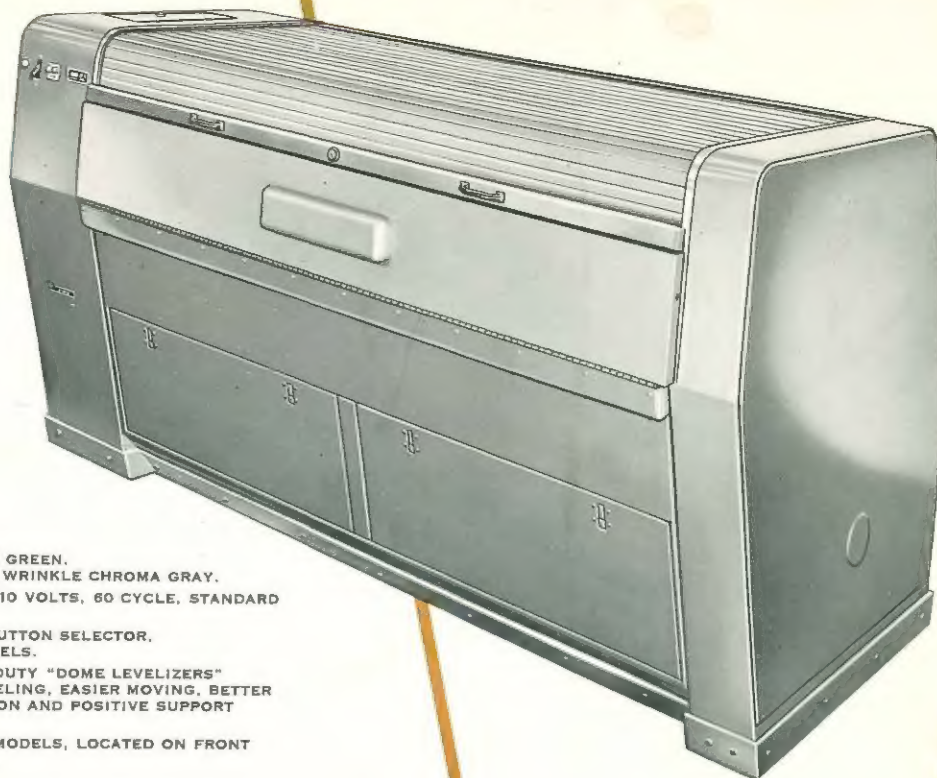

EMERGENCY HAND OPERATION

In the event of external power failure, a crank arrangement makes it easy to operate the Super "63" by hand. The crank is inserted through the front of the motor pedestal, eliminating any access problems caused by file location. Should the power suddenly come back on while the hand crank is in use, a safety device prevents current from activating the motor.

SUPPLEMENTARY OPTIONAL EQUIPMENT

NATIONWIDE SERVICE

Diebold's nationally known service organization is on call 24 hours a day, anywhere in the United States, should your Super "63" need service. Diebold branch offices and representatives are located in all principal cities. You are urged to call upon these men whenever you feel their counsel may be of help to you regarding the Super "63" or any other record-keeping problem you may have.
